LigaTurf RS+ 260 COOLplus®

LigaTurf RS+260 COOLplus® synthetic turf system has been successfully installed worldwide for many years and is preferred by professional and amateur players alike. This excellent "ONE TURF" product provides the best solution for rugby.

LigaTurf RS+260 COOLplus® meets FIFA ONE and TWO STAR, as well as IRB and Australian Rules field testing requirements in conjunction with quality construction standards.

Areas of Use
Rugby stadiums
Professional training facilities
Professional and amateur clubs

- FIFA certified
- World Rugby certified
- AFL/CA certified
- ERFL certified
- 'Entanglement Technology'
- COOLplus® function
- 100% PE formulation
- Resource conservation
- Professional
- Multisport
- Force reduction
- Energy return
- Heavy metal free
- No toxic fumes or V.O.C's
- Recycled rubber used

KEY BENEFITS

LigaTurf RS+ 260 COOLplus® is designed to provide a playing surface with a great range of football performance, outstanding longevity and at the same time meeting expectations in rugby playability.

No risk, no hassle and includes a proven maintenance regime to address high wear activity.

Safety: Play Longer!

Designed to provide a surface suited to club rugby standards of play whilst achieving the greater usage expected of a "ONE TURF" synthetic surface.

Functionality: Play Now!

LigaTurf RS+ 260 COOLplus® is utilised at the best European and New Zealand rugby clubs whilst also meeting the requirements of football.

Usage	Heavy	Moderate	Light
Hours per week	60	40	20
Recommended resurface time (yrs)	8-10	10	10+

OUR DIFFERENCE

LigaTurf RS+ 260 COOLplus® offers an outstanding playing surface and durability far superior to the Lisport wear testing requirements for FIFA.

Longevity is assured from the exclusive Polytex sports yarn UV stability and to satisfy the demand for better force absorption and fibre recovery.

The exclusive **'Entanglement Technology'** is a proprietary feature of the Polytex fibres, which interlaces the molecular chains in the turf fibre into a three dimensional matrix. The result is an exceptionally soft surface and greater protection against splicing with optimum playing properties and a considerably longer lifespan.

Unique **COOLplus®** function directly reflects the IR radiation which is invisible to the human eye due to the formulation that embeds pigments in the turf filaments. It effectively retards the heating process of the turf.

The fibres have a rhomboid cross section and a thickness of 360 micron. Exclusive 'Entanglement Technology' is a feature of a COOLplus® sports fibre.

Fibre shape

- 1 60mm pile height exclusive Polytex mono-filament sports yarn - incorporating spring-back technology for highest durability and play characteristics.
- 2 Recycled SBR rubber or Bionic infill fibre technology, proven quality performance infill.
Kiln dried silica sand stabilising infill.
- 3 Exclusive Qualiback 'Hybrid Emulsion' secondary backing; for superior seam strength.
- 4 Elastic layer shockpad, engineered to provide excellent sports performance whilst further contributing to recycled system content and successfully reused on multiple resurfacing projects.
- 5 Specifically designed pavement, engineered to construction standards and tolerances.
